

DrivingLABS Driving School Management System

DrivingLABS is a turnkey software platform designed and developed for use by small, medium and large driving schools. The system contains features, tools and functions that help driving schools run their business's more efficiently and cost effectively. The system is fully Web based, meaning it is accessible from anywhere in the world, all you need is an internet connection and a web browser. SIGN UP for the FREE 30 Day trial account at www.matchinglabs.com

The system offers scalability and flexibility in data management and business process engineering. Some schools use several different software packages to run their business, with DrivingLABS the software allows you to manage the most important aspects of your business using a single software platform which is fully customizable.

How DrivingLABS works

DrivingLABS offers a completely Web-based approach to data management and business process functionality. Driving school owners, instructors, customer support staff, students, and parents can all access the system 24 hours a day, 7 days a week, 365 days a year. Our software and each database on servers located in a secure data centre in Germany.

Online Enrollment for Clients

Our software can enable your school to take student enrollments directly from your Web site. All information is saved directly into your database. You also have ability to process credit card payments. Inquiries are handled via a cutting end API embedded on your Website by our developers.

The Calendar

Graphically displayed calendar availability will enable you to make the best decisions about which instructors and which vehicles to use for driving lessons. You will also be able to enter instructor availability and view each instructors comprehensive calendar. Billing and invoicing can also be done via the calendar. For driving schools, the calendar is a one stop shop on its own for managing your business. The calendar can be used on mobile devices, meaning your instructors will be able to use the system on the go.

Student Information

Maintain accurate student information with DrivingLABS. Easily add or edit student information that is accessible to you whenever it is needed at the click of a button . View all information about that student: personal information, balances owed, hlessons completed, and much more. Student tools enable you to search and manage students (both present and past).

Staff Individual Accounts

Create and manage individual accounts for office staff and instructors. The system also allows you to manage instructor enrolment, verification and approval.

Multi-Office and Franchise Locations

More than one location? No problem. Our software is fully scalable and can easily handle multiple locations and franchising areas. So as your business grows so does our software.

Customization and Branding

DrivingLABS can be fully customized. If you need features that are not part of our standard package, we can customize the software to meet your specific needs. Anything from online enrollment and student portal branding, to custom reports or just about anything that can help automate your business process and eliminate business process inefficiency.

E-mail Notifications and Reminders: To Instructor, Student and Parent

Our advanced automatic e-mail notification system will eliminate countless hours of calling and confirming appointments with clients and instructors. The system automatically sends email notifications and reminders to students and your staff.
